ARTICLE INFO

The TH 0/30 is a two-position controller that switches with a changeover contact at the set threshold. The returned continuous signal is evaluated by the ventilation or SHEV control panel and the connected actuators are activated.

Adjustable temperature range from 0 °C to 30 °C

The thermostat TH0 / 30 has an adjustable temperature range from 0 °C to 30 °C and is used as an internal temperature-dependent automatic release for ventilation purposes in SHE and ventilation systems. On request, an electronic thermostat with remote sensor is possible.

Thermostat at a glance:

- freely adjustable threshold temperature for thermostat type TH from 0 °C to 30 °C
- Can be combined with other operating elements in the building
