

Technical Data

ARTICLE INFO

The TH 0/60 is a two-position controller and switches with a change-over contact at the set threshold. The continuous signal is returned and evaluated by the control panel. The connected actuators are controlled.

Thermostat with internal temperature-dependent release

Thermostat TH 0/60 is used as an internal temperature-dependent automatic release for ventilation purposes in SHE and ventilation systems. It has an adjustable temperature range from 0 °C to 60 °C. On request, an electronic thermostat with remote sensor is possible.

Thermostat at a glance:

- freely adjustable threshold temperature for thermostat type TH from 0 °C to 60 °C
- can be combined with other operating elements in the building
- internal temperature-dependent automatic triggering

TECHNICAL DATA
